Est. 2019

“ We help produce and distribute over 100 tonnes) of fresh Dragon fruits produced at our farmers fields for agricultural, industrial and household services across all parts of India. Alongside our company’s major focus- Dragon fruit, we also help cultivate AVOCADO and CUSTARD APPLES. We have future plans to expand our range to include exotic and unique tropical fruits such as; Rambutan, Kumquat, Water apple, Pomelo, Passion fruit , Star fruit, Persimmon, Longan, Mangosteen, Durian and other exotic fruits. ”

ABOUT DRAGONFLORA

THE BIRTH OF DRAGONFLORA

We started our official journey with Dragon Fruits in 2019, when we formed our firm but we have been working with dragonfruit since last 2010. The idea of dragon fruit farming was fresh and untapped in some parts of India and across. There was no one to guide farmers about its cultivation and management we had to learn by our own practical experience and minimal knowledge of the processing of Dragon fruits. In 2019, Dr Sunila joined our team, since then our progress sped up with her scientific aptitude and crop nutrition expertise

After 4 years, as an assistant professor in the state agriculture university and additional 3 years as scientist horticulture in a corporate world with giants like TATA CHEMICALS LIMITED. On a very fateful event, Dr Sunila came across a very typical fruit known as Dragon fruit. She was amazed at the delicious rich taste of the fruit and developed a passion for it instantly.

OUR STORY

Our primary goals are to nurture, grow and expand the market for exotic fruits in India by promoting imports of the best produce in the world along side building the research and farming eco-system for these exotic fruits. With

**DragonFruit
(Pitaya)** at its core

GOALS

MISSION/VISION

Our mission is to expand the dragon fruit market by establishing numerous developmental projects to inspire agricultural entrepreneurs, transform farming potentials in India into a sustainable business and also equip farmers with world-class training on Crop/Farm management.

We develop innovative and value-added products.

Like Jam, Ready To Serve Drink, Powder, Freeze dried products:
